

High-performance Printing for SaaS Customers

- **The Company:** With revenues of €258 million in 2012, more than 2,000 employees and nearly 400,000 users worldwide, Cegid is one of the leading IT companies. Today, 80,000 users benefit from SaaS Yourcegid On Demand. In this SaaS segment, Cegid recorded growth of 35% in 2012.
- **The Solution:** In order to offer clients the best possible printing solution via WAN connections, Cegid opted for ThinPrint.
- **The Result:** Efficient transmission of the print data while optimizing bandwidth consumption is guaranteed with ThinPrint. Users of the Yourcegid On Demand SaaS solutions also benefit that network performance is not adversely affected by print jobs. Another important argument for choosing the ThinPrint solution was the virtual driver ThinPrint Output Gateway. This enables support of customers' printers without the need to install and manage native printer drivers.
